

**APPENDIX 29.1 – RALLY CAR CLASSES AND SPECIFICATIONS – ARTICLE 8 – 25
FEBRUARY 2020**

Effective date: Immediate

Key: ~~deleted text~~ **new text**

ARTICLE 8.

To determine the cubic capacity of forced induction cars **for class purposes** a multiplication factor of 1.7 will be used for Petrol and 1.5 for Diesel. Cars up to 2050cc running Forced Induction in modified classes will have their "cc" determined by a multiplication factor of 1.7 for Petrol and 1.5 for Diesel and will run in the appropriate cc 16v class, engines 2051cc to 2500cc (See notes on engines).
